The Boys' Club staged a very successful concert on Monday evening, in the Big Hall, before a good sized audience. The program consisted of recitations, musical numbers and several skits. The proceeds, \$28, will go to the Camping Fund.

The Supper given by the Ladies Aid, on Tuesday, was well patronized and thoroughly enjoyed by everyone.

A. Grace is contemplating a truck route, between Monitor, Sedalia and New Brigen, for collecting cream. Meat would also be carried to be sold at the country points.

The recital on Jean Valjean, given by Mrs. J. Smith, Saskatoon, was listened to with rapt attention throughout the whole course of the story.

Clean up the yards and streets before May Day.

The West Regent commenced drilling operations on Monday and is working night and day.

The engine for the Imperial well arrived here on Friday and has been set in place. They have their full crew here now and are about ready to start drilling again.

L. Wiltse and J. Anker, of Bentley Alta., former residents in this district, have been spending several days in town.

Miss R. Cameron returned on Thursday after a few weeks vacation at points in Sask.

Joe Lewis is building a house on Main St.

Mrs. T. H. Noad was a visitor in Calgary for the holidays.

L. O. Gould and M. Barker are under the doctor's care in the Military Hospital down at Calgary.

Provost will hold its Annual Sports, this year, on June 21st and 22nd.

Miss M. F. Hargrove spent the Easter holidays with her parents, returning to Altario on Tuesday.

During Easter several of the local tennis addicts indulged in a few games.

Local Happenings

The next meeting of the W. A. will take place on Thursday April 20th at the home of Mrs. Grace, at 3 p. m. sharp. Good attendance is requested.

Agents are now being appointed to look after cream shipments at country points, to replace the cream buying stations. Agents will be permitted to solicit and look after cream shipments but cannot do any testing, weighing or sampling.

Several agents have already been appointed, here in town, and they will start in the cream business when the buying stations are closed.

The Easter Services at the Cooperative Church were splendidly attended and were helpfully in every way. At both morning and evening services the choir led in the singing of the Easter hymns and most acceptably rendered special Easter chorages. The Pastor wishes to grasp this opportunity of sincerely thanking all who helped to make these service the inspirational help they proved to be.

Business and Travel Less In 12 Months of 1921

Value of Economical Management at This Time is Shown in Big Railway's Increase in Net Earnings in Face of Decrease in Gross.

THE report of the Canadian Pacific Railway's operations during the year 1921 will be an unusually interesting document to Canadians. The annual report of this Company is always of interest in view of the fact that, more truly and more completely than any other report issued, it year by year reflects the state of national trade and industry. The C. P. R. touches all parts of Canada. Its earnings at once reflect the prosperity or depression that may exist in any part of the country, and the sum total of the year's operations as analyzed in this report may confidently be accepted as an unerring indication of how the country has prospered during the twelve months under review.

At this late date there is no new in the statement that 1921 was not a year of uninterrupted progress, but it is interesting to review the period, and in the light of some such comprehensive report as that of the C. P. R. to clearly see in what direction Canada's business affairs are moving. In this respect the C. P. R. report for 1921 is an outstanding example. In spite of a large decrease in gross earnings, the company is able to show an increase in net as the result of rigid economy throughout its working operations, and in so doing it has pointed out to all Canada the shortest road back to normal trade activity.

During 1921 the company's gross earnings were \$193,021,854 as against \$216,641,349 in 1920, a decrease of \$23,619,494, or 10.20 per cent. This decline followed naturally upon the general business depression resulting in lessened passenger and freight traffic, decreases in both passenger and freight rates, and to a partial crop failure in some parts of Western Canada.

The Company's sales of agricultural land in the year were 153,304 acres for \$2,872,000, or an average of \$18.74 per acre. Included in this area were 6,000 acres of irrigated land which brought \$55.13 an acre, so that the average price paid for the balance was \$17.17. Land sales reflected a large decrease in acreage, but as is pointed out by President E. W. Beatty in his annual report, the adoption of reasonable immigration laws designed to encourage the entry into Canada of immigrants of the right type would result in an improvement in this connection.

In the face of the decline in earnings it was necessary to make a sharp reduction in operating expenses if the sound position of the company was to be maintained. For the year these expenses amounted to \$158,820,114 as compared with \$183,485,204 in 1920, the result of the decrease being that the net earnings for the year showed an increase of \$1,048,695, totalling \$34,201,740 as against \$35,153,044 in the previous year. The year's operating expenses amounted to \$22.28 per cent. of the gross earnings and the net to 17.72 per cent. as compared with 24.70 per cent. and 15.30 per cent. respectively in 1921.

How large a part the Canadian Pacific plays in industrial life may be gathered from the fact that more than half, or 53.84 per cent. of the total \$158,820,114 working expenses for the year was paid out in wages, while one quarter, or 25.92 per cent. was used for the purchase of supplies. The purchase of fuel and supplies for locomotives took another 15.51 per cent. and government taxes consumed 3.49 per cent.

The contraction in the country's general trade is perhaps more clearly indicated in the following figures on passenger and freight traffic. During the year 15,146,081 passengers were carried by the company, as against 16,769,555 in 1920. The average journey was 89.67 miles and average fare paid was \$2.59. In 1920 the average journey was 102.45 miles and the average fare paid was \$2.59. Thus we see that not only was the number of passengers smaller in 1921, but each passenger, on an average, made a shorter trip, and paid less in fare.

PUBLIC NOTICE

Parents Please Note
 On Sept. 23, 1921, the Monitor School Board passed a resolution to the effect that classes for children between the ages of 6 and 7 years, would be started on January 1st and September 1st, only.

At the present time, owing to the crowded condition of the School, this will have to be strictly observed.

Board of Trustees

Village property must be cleaned up by May 1st, and all refuse, ashes, garbage, etc., removed. If not done by May 1st the cleaning up will be done at the order of the Council and cost thereof charged against defaulter. After May 1st garbage must be kept in covered receptacles, and ashes placed in a convenient place for removal.

By order of the Village Council

The Village Council remind all concerned that Dray and Auto Livery Licences should be obtained at once.

Vast Pasture Lands In Extreme Northern Part Of Western Canada

Americans are sometimes wont to talk of Canada as a "fringe of civilization backed by a frozen hinterland." Sometimes citizens of Regina who penetrate into Northern Saskatchewan in winter are tempted to half agree with the Yanks, and after all the agricultural possibilities of Canada for all its vast arable prairies, are pretty small when the whole area of the Dominion is taken into consideration. A man who beheld the vast unpopulated lands of the Peace River country, saw a field of wheat ripe at Fort Smith, 600 miles farther north than Regina, and others who gazed on splendid vegetable gardens at Hudson's Bay posts beyond the Arctic Circle have had reasons to reconsider previous notions of Canada's cramped agricultural possibilities.

Stefansson, in his book, the "Friendly Arctic," now assures Canadians that the vast expanses of the so-called barren lands away to the north of the farthest wheat land, starting at about York Factory, Hudson's Bay and running northeasterly towards Great Slave Lake and embracing the huge tract between that and the Arctic Ocean, are one vast pasture land of nutritious grasses. Yes, and not only the mainland Barrens, but the Arctic Islands to the north, which the average Canadian is inclined to think of as vague indefinite masses of sheer ice and snow worthless for anything. But Stefansson, who has spent 11 years beyond the Arctic Circle, walking an average of 2,000 miles a year, exploring the vast north on behalf of the Canadian Government, assures Canadians that they have a wonderful heritage up north, where reindeer and muskoxen may be profitably raised to supply meat to the residents of every part of this country. Stefansson declares that the average school boy has been misinformed about the north through text books.

The world's largest area of grass lands is undoubtedly in Northern Eurasia, and to it only Canada is second. Northern Norway, Northern Sweden, Northern Finland, Northern Russia and Northern Siberia are mountainous in some parts and forested in others, but in general they form together a great prairie and variously estimated at from four million to six million square miles, or anything from the full size of the United States to one and one-half times that area. But in Northern Canada we have the next largest grazing area in the world. One and one-half or two million square miles of prairie land, equal to half the area of the United States. There are no mountains, although there are rocky hills. In some places there are alkali flats without vegetation, and in some places there are forests, but in the main it is a verdure clad prairie. Whether in square miles or in tonnage of flowering plants the grazing areas of the Argentine or of Texas are insignificant in comparison.

"These grass lands are not only in the northern portion of the continent, but also the islands that lie north of Canada, even to the north coast of the most northerly of them. The vegetation is only in part of a typically polar nature, strange to southerners. In part it consists of common plants, such as various sedges, blue grass, Timothy, golden rod, dandelion, blue bell, poppy, primrose and anemone and the like. More than 115 species of flowering plants are known to exist in Ellesmere Island, the most northerly of the Canadian islands. Sir Clements Markham says in his "Life of Sir Leopold McClintock," that in the Polar regions in general there are more than 325 varieties of mosses, 250 varieties of lichens, 28 varieties of ferns and more than 762 varieties of flowering plants."

Sheep in Alberta

Approximately 220,000 head of sheep, valued conservatively at \$1,250,000, are owned by members of the Southern Alberta Wool Growers' Association. During the past year the association shipped 1,750,000 pounds of wool, valued at over \$300,000. Over 50,000 lambs were sold, valued at \$250,000; 10,000 old ewes contributed another \$30,000. The members own land valued at \$10 an acre, amounting to \$3,500,000, and lease \$90,000 acres.

Earth's Climatic Changes

New Theory is Offered by a British Scientist

A new theory has been offered by Dr. Harlow Shapley, an English scientist, relating to the mystery concerning the climatic change on the earth over millions of years. According to this theory, the earth has been cooled off during long periods, when the sun, the earth and the other planets were passing through regions of space filled with clouds of dust or dark, nebulous materials, which cut off enough of the sun's heat to freeze most of the globe. At other times apparently, the solar system moved through a region of space almost entirely free from such material, so that the sun's rays beat with full force on the earth probably making the polar regions pleasant and the rest of the earth unlivably hot. At present, the sun is apparently moving through a part of space thinly scattered with interplanetary materials.

A few million years ago, according to Dr. Shapley, the earth, the sun and the other planets were moving through a mark which is observed by astronomers in the constellation of Orion. This is one of the many vast black pockets or "coal sacks," in the sky, some of which may be detected by the naked eye. Behind this veil in Orion are 70 faint stars which vary in intensity. They average about 700 light years (about 180,000,000,000 miles) from the earth, which is a moderate distance astronomically, and many of them would probably be very bright except for the curtain of dark material hung between them and the earth.

Prosperity Of Canada Depends On Development Of Our Natural Resources

Speculation In Russia

Food and Clothing Sent Where Prices Are Double

Russia is money mad. Almost everybody from the humblest communist to the erstwhile aristocrat is thinking, dreaming talking of money. Public events, life, death, all else go by the board.

As the ruble drops dizzily, week by week, people cease to talk or do business in millions, as a few months ago. Now everyone of money consequence is not a millionaire but a billionaire and soon they will be trillionaires. A million rubles lately has been equivalent to \$2, a billion to \$2,000.

Speculation has reached such pitch that the cabman speculates on his fare. To one he charges 50,000 rubles for a ride, and to another 100,000 or 200,000, according to his wit.

The man, woman, or child who doesn't get rich in Russia today must be a fool, indeed. One has but to buy any article, a pair of shoes, a Persian rug, a lamp, a watch, a ring, a half dozen yards of cloth and hold it for a few days and sell it for twice the cost.

There is speculation in cloth. Most of the good cloth now in Russia is smuggled in. A little money is paid here, there, everywhere, and the cloth gets in. Then speculation takes place in its distribution. In the south of Russia cloth is cheap, hence it must be transported to the centre or north, where two or three times its cost may be obtained. If sent to Siberia, the profit is immense.

Speculation in food is the biggest affair. An official who controls a private car makes millions moving flour, fruit and wine to the centres of high prices.

What a Boy Should Know

Great Student Outlines Plan of a Boy's Education

Lord Kelvin was a brilliant boy who became a very great and learned man. He entered the university when he was eleven, and was a professor of philosophy at twenty-two. It is not recorded of him that he ever refused to study a subject or found any branch of learning useless.

As an old man of eighty-three this great student outlined, says Mr. Arthur Warren, in London Days, the plan of a boy's education.

"By the age of twelve," said he, "a boy should have learned to write his own language with accuracy and some elegance; he should have a reading knowledge of French, should be able to translate Latin and Greek authors and should have some acquaintance with the German. Having learned the meaning of words, a boy should study logic. I never found that the small amount of Greek I learned was a hindrance to my acquiring some knowledge of natural philosophy."

Some knowledge of it! There indeed was modesty, for who had more knowledge of natural philosophy than Lord Kelvin?

The Life of Farm Machinery

Properly Cared for Machines Will Last Much Longer Than Those Neglected

It has been determined that the average life of unhouse, uncared for farm machinery is about five years, while properly protected implements will last two or three times that long. If a machine is worthless five years after it was purchased, it has an annual depreciation of 20 per cent. Suppose you have \$750 invested in implements and you have to charge off 20 per cent. annually to depreciation (due largely to carelessness in not housing them)—that is, \$150. If these same machines were kept in a good implement shed, when not in use, they should last at least ten years and you would have 10 per cent. depreciation—or \$75—to charge off each year. It would not take long at this rate of saving—\$75 a year—to pay for the shed and at the same time your implements would be more efficient and you would lose less time making repairs during critical seasons.

The urgent necessity of removing from the immigration laws of Canada all irksome restrictions which are hampering the entry into Canada of good settlers for the farm lands and forests of the Dominion was presented in no uncertain terms by Lord Shaughnessy, chairman of the C.P.R., speaking before the Junior Bar Association of Montreal in the Reform Club.

"The natural feeling that grew out of the war," said his Lordship, "encouraged the placing of restrictions on immigration that have been most disastrous in their results. We must have these restrictions removed. We must have settlers from all over the world, not artisans, but men who will go out on to our lands and our forests and fisheries and help to develop these resources, and there must be an insistent demand on Parliament to pass legislation that will open the doors to them."

His Lordship further pointed to the need of making good Canadian citizens of these immigrants, and to foster throughout the Dominion the spirit of Canadian citizenship. Mutual understanding and neighborliness between Canadians at opposite extremes of the Dominion must be promoted by every possible means.

"It is quite clear that the farmers, the agriculturists of the prairie provinces cannot on occasions see eye to eye with the manufacturers of the east. It is equally clear that British Columbia, three thousand miles away, cannot form any very correct conception at times of the ideals of the Province of Quebec. It can only be done by interchange of views, by the exercise of the greatest possible tolerance on the part of everybody. In the years between 1902 and 1912, the years of our maximum prosperity, there is no doubt, that every part of the country participated alike in that prosperity. There was no difference. The farmer in Manitoba or Saskatchewan, or Alberta, or the timber man in British Columbia, the people of Quebec, Ontario and the eastern provinces all participated in the prosperity and they will again. When we have passed the present unfavorable condition of things they will participate again, but in the meantime we may have a time when parts of the country will feel that others are prospering at their expense. We must endeavor by every possible process to correct that impression."

"The foundation stones of our prosperity are our lands, our mines, forests and fisheries. These must be developed as rapidly as circumstances will permit. If we are to make the best of our opportunities in the next few years and to meet the burdens which are laid upon us. We cannot do that without immigration. The natural growth of population will not be sufficient to meet the demand."

"We must have immigration. We have had very little since 1914. On the contrary, I am afraid we have lost somewhat. Then, after the war the natural feeling that grew out of the war encouraged the placing of restrictions on immigration that have been most disastrous in their results."

"Then there is the need to see that they become good citizens. They must be encouraged or if necessary compelled to become good Canadian citizens, although I prefer the former method if possible. They should be taught that the interests of their children and of their children's children are in Canada."

"We should endeavor to spread through the country the feeling of such ardent fervor in citizenship that every citizen, whether British born or naturalized, when he spoke of home, would mean Canada, and no other country in the world."

Canada Imports from Jamaica

A report from Kingston, Jamaica, states that in the last nine months, as compared with the corresponding period of the year previous, Canadian imports of Jamaican hides and skins and spices doubled; and vegetable oils increased by fourteen times their previous bulk. Shipments of raw sugar from this colony increased. These figures cover the first period during which the Canada-West Indies Trade Agreement of 1929 was operative.

Have You Ever Seen a Basilisk?

Basilisk. This duty is the same that falls to the lot of every insect-eating creature. If insects were not being reduced, every day, hour—minute—our world would soon be not only possessed entirely by them but completely overrun by them.

Pimble one day was on one of his tours of adventure in South America. He happened to be perched on a thickly leaved branch watching the antics of some chattering monkeys when suddenly his eyes fell on a Basilisk. A green-brown one covered with scales! "Help!" the Brownie prayed in a whisper. "Oh, help!" for he thought that surely his last moment had come. Never again would he see his adored Stella, the Wishing Fairy! Never again would he see their beloved End-of-the-Earth home!

When you remember that the Brownies are only about a quarter of an inch in size the Basilisk's thirty inches looked fully a mile long to the terrified Pimble, and, to make matters worse, the Basilisk was coming straight toward him, with its mouth wide open!

"It could easily swallow a dozen such as I!" he thought, and his heart pounded so hard against his ribs that he was sure it must echo through the hills. "Oh, help!"

Imagine his amazement when the Basilisk passed him without as much as a glance of notice, and a little distance further on caught a large winged insect in its jaws, which it swallowed with a grin of delight! Then it bore down on a big Spider; a Caterpillar went next, and Pimble in the course of a short while counted at least sixteen victims to the Basilisk's appetite.

"Evidently I'm not considered good to eat," thought Pimble, "but perhaps I might be more appreciated to talk with. Let me see." So, wriggling down the branch in the direction of this odd animal, he approached it with a question. ("Pimble approaches everything with a question.")

"Which tasted the best?" he timidly asked.

"It was a lucky subject, for it was one particularly appealing to the Basilisk."

"The Caterpillar, of course," it answered. "I always like them better than insects, because they are soft and fat and have no hard shell to scratch my throat. I never eat anything that I don't know all about. Who are you?" Pimble was just about to tell him when he thought that after the remark about never eating strange things perhaps it would be wiser not to.

"Oh, I'm a stranger from the End-of-the-Earth," he answered, "and I'm very curious to know just what you are."

Copyright, 1922

that I was too busy watching you. You are a wonderful hunter!" the Brownie said. This pleased the Basilisk so that it immediately began talking of itself. And Pimble learned all about everything connected with its life and family, and the two then and there became quite friendly. There is also a banded Basilisk that lives near the water, and, dropping in, it swims away from danger. Its eggs are left for the sun to hatch and, like its helmeted cousin, it also lives on insects and fruit.

Entirely New Treatment For Bronchitis, Catarrh.

No Internal Medicine to Take.

Years ago the profession fought Catarrh by internal dosing. This upset the stomach and didn't remove the trouble. The modern treatment consists of breathing the healing, soothing essence of Catarrhazone, which goes instantly to the source and the trouble. Catarrhazone is successful because it penetrates where liquid medicines can't go. The balsamic vapor of Catarrhazone drives out the germs, soothes the irritation, relieves the cough, makes Catarrhal troubles disappear quickly. For bad throat, coughs, bronchitis, Catarrhazone is a wonder. Two months treatment one dollar. Small size 50c. Sold everywhere or The Catarrhazone Co., Montreal.

Vertical Flight Problem Solved

Test of Handley-Page Slot Wing Proves Successful

The latest tests with the now famous Handley-Page high lift slot wing show that the future of vertical and horizontal flights is solved by aircraft fitted with such high lift wings rather than by the helicopter system.

The new Handley-Page torpedo-carrying aeroplane, the first machine fully equipped with the variable slot type of wing, has undergone further test flights.

As soon as the engine was "opened up" the biplane jumped straight into the air with practically no preliminary run.

When the slots were closed it showed a very high speed; when they were opened again the machine slowed down to practically nil and descended vertically on an even keel for more than a thousand feet, in a space about as big as a tennis court.

What is more important still, it could have flown away again from the same restricted space.

The action of this opening and closing wing is similar to the action of a bird's wing when it opens and closes the main feathers for slow landing on a telegraph wire, and when flying from a confined space.

It was invented by Handley-Page in March, 1920, since when Handley-Page's have been carrying out exhaustive tests.

The latest machine is nicknamed "The Heintz," owing to its being said to have 57 different varieties of control.

The machine proves that this

Could Not Eat

Constipation is caused by a torpid condition of the liver. Dosing with salts, castor oil, etc., to move the bowels, cannot afford more than temporary relief.

If you are to rid yourself of this ailment and the scores of annoying symptoms and diseases which come in its wake, it is necessary to get the liver right by such treatment as is suggested in this letter:

Mrs. Alvin Richards, R. R. No. 1, Seely's Bay, Ont., writes: "For two years I was afflicted with indigestion, and in the morning when I got up my breath was bad. I had a poor appetite, and just felt like eating certain foods. I used many different medicines as a laxative without benefit, and the doctor's medicine did not help me at all. Finally I tried Dr. Chase's Kidney-Liver Pills, and found them better than anything I had ever tried. I can highly recommend them to anyone troubled with constipation or kidney troubles."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers, or Edman's, Bates & Co., Ltd., Toronto.

W. N. U. 1416

At Tea Time In The South

The wonderful creations that are now on display for Southern wear. This stunning frock is of white silk crepe and a broadened fabric in blue and white uncut velvet. The lines are rather-Jong and square. The side panels are longer than the rest of the frock, giving this mode the uneven hem line which is so popular just now.

wing is a definite revolution that is going to make aviation a wonderful commercial proposition.

Movement Towards Canada

Nebraska Farmers Interested in Farm Land in Canadian West

(Special Correspondence by G. C. Porter, of Winnipeg)

Omaha.—During the past twenty years this section has been a most prolific recruiting ground for emigrants from the rural districts, who desired to move into the Canadian Northwest. More purchasers of land than homesteaders have been contributed by Nebraska to the Canadian prairies, but many homesteaders also have gone from here.

W. V. Bennett, Dominion Immigration Agent at this point, is daily in receipt of personal calls and letters of enquiries from all over the State from those who are going or contemplate going to the Canadian Northwest.

Homesteading is not very popular with Nebraska emigrants except with the younger sons of the farmers who were themselves homesteaders in Western Nebraska. The agents supply these people with railroad maps and valuable advertising matter prepared by the Government.

Many Canadian and American soldiers who served overseas are anxious to obtain land on the Prairie Provinces. Many of these boys are bachelors and want homesteads. They have some money and a few of them want to buy land. In cases where they have had experience as farmers they are promptly taken in hand and given every encouragement. If they are mechanics and want to go to the different cities they are acquainted at once with the conditions prevailing in their particular trades.

Dr. A. H. Hippie is chairman of the citizens committee which is arranging to have J. Bruce Walker, commissioner of Dominion Publicity, deliver addresses here before the Chamber of Commerce, the Kiwanis and Rotary Clubs. Dr. Hippie spoke enthusiastically of the movement towards the Canadian Northwest. Prominent business men are helping the movement which they say they expect to see toward Canada and the Central States this spring.

Business Brothers

President Neilson, of Smith College, was making a rather tedious journey and was glad when the man who had the seat in front of him turned around and began a conversation. The man proved to be a traveling salesman and took it for granted that Dr. Neilson was another. "What's your line?" he asked. "Mine's skirts." "Well, so is mine," said the president of Smith.—New York Evening Post.

Found Them Best

She Had Ever Used

WHAT MRS. PARLEE SAYS OF DODD'S KIDNEY PILLS

Sussex, N.B., Woman who Suffered From Many Forms of Kidney Trouble. Sings the Praises of Dodd's Kidney Pills.

Sussex, N.B.—(Special).—Mrs. L. Parlee, who lives on Broad Street here, is another of that great army of Canadian women who are always ready to say a good word for Dodd's Kidney Pills. Every one of them has a reason.

"I have found Dodd's Kidney Pills of good value to me," Mrs. Parlee states. "I had typhoid and it left me with mill legs. I suffered also from cramps in the muscles, backache, headache and heart flutterings. My sleep was broken and unrefreshing. I was always tired and nervous and I had dark circles under my eyes."

"I took two boxes of Dodd's Kidney Pills and they have done me a lot of good. I have found Dodd's Kidney Pills the best I ever used."

Mrs. Parlee's troubles came from the kidneys. Ask your neighbors if Dodd's Kidney Pills are not the most reliable of all kidney remedies.

Harsh But Necessary

Revolting as it seems for airman to drop bombs on their own people, no government has any choice but to fight when revolution boils up. What Kinga have done in defence of their throne and Godshviki rulers have done in defence of their power, a liberal government like that of South Africa must also do when challenged. General Smuts, who has little faith in the ultimate solution of social troubles through force, may be relied upon when possible to use intelligence in place of bullets.—New York Sun.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

The aborigines inhabiting the Malabar Islands speak to each other at a distance by whistling, the whistlers being selected for their ability to whistle loudly. They make this their livelihood.

Fur Farming

Western Provinces Offer As Good Opportunities as the East for this Industry

Dr. W. G. Church, Dominion Inspector of Silver Black Foxes for Live-stock Branch, Department of Agriculture, Ottawa, Ont., says:

After having personally visited the different provinces of Canada, and studying the situation from every angle, I am convinced that there are wonderful opportunities for this industry in the western provinces. When I say wonderful, I will quote what has been done by one of the eastern provinces, and in a future article will explain why the west has a chance of doing equally as good, if not better work than the east has done.

Everyone recognizes the fact that Prince Edward Island is an agricultural country. They also know that she is an island, and therefore rich in fisheries, and this island is often referred to as the garden of the gulf, and everyone who has visited this island has been willing to concede that this is the proper title, and that it certainly is a garden, and when they investigate the fishing industry, they are also ready to concede that it is also a great source of revenue. For there on the shores of this island are caught the most delicious oysters which command the highest market price, as also do lobsters, clams and many varieties of deep water fish, such as mackerel, cod, salmon and halibut that went to swell the revenue from this industry.

Then combining the revenue from both the fisheries and agricultural

Truce Is Declared Between Factions Along The Fermanagh Border

Belfast.—A truce was declared between the Ulster special constables and the Free State troops which have been in menacing proximity along the Fermanagh border between Ulster and South Ireland, it is announced here.

Sir Basil Brooke, commanding the Fermanagh specials, crossed into Free State territory at Blacklion near Belleek, and conferred with the rival leader.

The interview was harmonious and an agreement was reached under which both sides will withdraw their forces a short distance from the border line to avoid the risk of a clash. Each commander agreed to punish infringers of the pact.

The son of a farmer named Kelly, living at Listerkelt, Armagh, while going to fetch medicine for his mother, was overtaken on the road by a motor car. Kelly failed to satisfactorily answer questions put to him by the occupants of the car, who took him into the machine and drove away. Afterwards the men blindfolded Kelly, nailed him in a ditch and fired a volley at him. Kelly later was found gravely wounded and taken to the infirmary in Armagh.

Hawaii Hears Music from Alberta

Calgary.—A concert programme of music played on a phonograph at the Canadian Government wireless station at High River on March 21 last was heard for half an hour at the town of Wailuku on Maru Island, 100 miles from Honolulu, or just about 2,800 miles from High River, Alberta. Word to this effect was received by W. W. Grand, wireless chief of the Canadian Government station at High River.

War Memorial for Moose Jaw

Moose Jaw.—Residents of Moose Jaw, at a special meeting called by Mayor W. F. Dunn, decided upon the erection of a temporary war memorial in this city. A committee, composed of Mayor Dunn, Col. Norman Gentles, Mrs. W. H. Greene, J. R. Greene, chairman of parks board, and three others to be chosen later, was nominated by the meeting to proceed immediately to draft details for erection of the memorial.

Japan Welcomes Prince

Royal Visitor Heartily Greeted by Thousands in Yokohama

Yokohama.—The Prince of Wales has arrived for his official visit to Japan. Thousands greeted him as he landed from the British battle cruiser Renown which brought him from India.

His reception was carried out according to the programme to the minutest detail, as is the Japanese custom. Yokohama's welcome was not noisy as the children who lined the streets are disciplined to silence, but the picture they made with their thousands of waving flags in the brilliant sunshine could scarcely be paralleled. The Renown was escorted in from sea by the Japanese light cruiser division and in the bay six battleships, including the famous Mutsu, joined the escort. As the vessels entered the harbor there was a roar of guns and shrieking of sirens. Every class of society was represented in the crowds on the wharves.

The Prince left Yokohama for Tokio in a special train, three coaches of which were especially built for his use.

Lord Curzon's Note Pleases United States

Britain Recognizes Re-imbursement Claim for Army in Germany

Washington.—Secretary Hughes received from Ambassador Harvey in London, a note from Lord Curzon, Foreign Secretary, which stated that the Government of Great Britain would not in any circumstances desire to question the rights of the United States in its claims for payment of costs of the American army of occupation in Germany. Secretary Hughes later transmitted a note to Ambassador Harvey for delivery to the British Foreign Office, expressing his gratification over Lord Curzon's letter and expressing hope that reimbursement for costs of the United States' army in the Rhineland would soon be made.

Law Degree for Gen. Pershing

Montreal.—General John Pershing, chief of staff of the United States army, will receive the honorary degree of doctor of laws at McGill University on May 12, it was announced here by General Sir Arthur Currie, vice-chancellor and principal of the university.

Canada's Navy Has Returned

Halifax.—The Canadian naval squadron consisting of the light cruiser Aurora, destroyers Patriot and Patricia, and submarines CH-14 and CH-15 have arrived in Halifax from West Indian waters.

COULDN'T DO HOUSEWORK, HEART WAS SO BAD

Many women get weak and run down and unable to look after their household duties owing to the heart action becoming impaired or the nervous system unstrung.

Nature intended women to be strong, healthy and happy instead of sick and wretched. But how can a woman be strong and healthy when day in and day out she has to go through the same routine of work, sweeping, dusting, cooking, washing, etc. Is it any wonder that the heart becomes affected and she gets irritable and nervous, has hot flashes, faint and dizzy spells, smothering and sinking spells and can't sleep at night.

To all women whose heart is weak and whose nerves are unstrung we would recommend

MILBURN'S

HEART AND NERVE PILLS as the best remedy to tone up the system and strengthen the weakened organs.

Mrs. Daniel Bezanon, Loganville, N.S., writes:—"As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me. My heart was so bad at night I could not sleep, I would take smothering spells, and was so weak I could not do my housework. I tried two doctors, but got no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

No Duty on Gifts to War Areas

London.—A law was promulgated according to Reuters' Paris correspondent, abolishing customs duties and other taxes on gifts to departments and communes in the devastated areas of France. The law is to be retroactive, and duties already levied on such gifts will be cancelled.

Anthracite Producers Believe That Miners May Modify Demands

Asiatic Settlers Not Desirable

H. H. Stevens Appeals for Policy of Restricted Immigration

Kingston, Ont.—Speaking before the Canadian Club here, Hon. H. H. Stevens, M.P., Vancouver, made a strong appeal for a policy of restricted immigration.

"We want an increase in population," he said, "but we must shut the bars against all races and types that cannot be assimilated by us. By assimilation I mean marriage. We can take British who want to go on the land the Danes, Swedes and Norwegians, all of whom make ideal citizens, but we cannot admit people from Central and Southern Europe and Asia."

Mr. Stevens urged that Canada could not withstand a great immigration movement from China, Japan and India. The white race would eventually become swallowed up if no effective laws were enforced against Oriental immigrants.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Try it! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Large Acreage in Manitoba

Plenty of Moisture and Bumper Crop Yield Anticipated

Winnipeg.—With an early spring well on the way and plenty of moisture guaranteed for early months, a bumper crop was predicted for Manitoba in 1922 by Hon. G. H. Malcolm, minister of agriculture when discussing the general situation.

"There has never been as much land plowed and ready for seed as there is this year," Mr. Malcolm said. The acreage in shape for immediate work is placed at 4,902,650 acres, as compared with 4,328,200 in 1921. These figures do not include the spring plowing, which will be under way within the next fortnight. The total acreage sown to crop last year was 7,415,037.

The districts which have been infested with grasshoppers during the past three years are free of the pests this year as nearly as can be judged at this time, and Mr. Malcolm declared that he did not believe these pests would be a menace this year.

Famous Picture to be Loaned

London.—Hon. P. C. Larkin, Canadian high commissioner, has obtained from Sir Wm. Orpen, the famous English artist, the loan of Sir William's painting "Hall of Mirrors" for the Canadian national exhibition this year.

Old Age Pension Plan

Ottawa.—The advisability of the Canadian Government instituting a system of old age pensions will be debated in the House of Commons. Dr. J. E. LaFontaine (Liberal, Hull), has filed a resolution on the order paper.

New York.—Anthracite producers notice a tendency on the part of the union leaders to soften their 19 demands when, before the miners and operators sub-committee on wage contract negotiations they asked permission to reconsider their demand number one.

This demand stipulates that the new contract agreed upon in settlement of the pending strike shall extend for two years; prohibits the making of individual agreements and provides for the establishment of uniform wage rates for operators and mechanical loaders.

Operators reported they had balked at part three of the demand, asserting that a uniform rate was already in effect where mechanical loaders were in use. With their consent discussion of the demand was temporarily abandoned, to permit district presidents to consult their men before deciding whether it should continue to issue in the negotiations toward settlement of the strike.

Only three of the 19 provisions which the strikers have insisted their next contract must contain, have been taken up by operators. With none of these points settled and 16 more to be considered, both sides predicted that several weeks will lapse before a foundation will be laid for a new contract and work begun in the anthracite regions.

War on Border Smugglers

U.S. Will Fight Rum Runners at Canadian Border With Machine Guns

Albany, N.Y.—Adjutant-General Kincaid has made public a telegram from Roy A. Haynes, Federal Prohibition Commissioner, in which Mr. Haynes was quoted as endorsing the Adjutant-General's plan to co-operate with Ralph A. Day, Federal Prohibition Director, for the State, in an intensive campaign against rum smugglers along the Canadian border. Employment of machine guns and armored motor cars to be furnished by the Adjutant-General, was contemplated in the campaign to stop the illicit traffic, according to the announcement of the plan in New York.

Thieves Take Liquor

Winnipeg.—In the absence in Ottawa of R. T. Ferguson, general representative of the distillers of Canada, thieves with a motor car visited his residence, tied and gagged a Chinese cook, and carried away two loads of liquor.

Self Preservation—Nature's First Law—Heed It!

Preserve Your Strength

Tillsonburg, Ont.—"Ever since I can remember, Dr. Pierce's medicines were used in our family at home and they never failed to give good results. The Golden Medical Discovery was used as a tonic and blood purifier also for bronchial trouble and it proved excellent. I myself have taken the 'Discovery' for bronchial trouble and Dr. Pierce's Favorite Prescription to build me up when I was run down, and they were both very beneficial."

"I feel safe in recommending all of Dr. Pierce's medicines knowing them to be good."—Mrs. Clifford Mitchell. Obtain these famous medicines now at your nearest drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeport, Ont., for a trial package of any of his remedies. Write Dr. Pierce, President Invalids' Hotel in Buffalo, N. Y., if you desire free medical advice.

How's Your Liver?

Health Is Kept, If You Observe This Sinaluta, Sask.—"I have taken Dr. Pierce's Golden Medical Discovery for liver trouble and found it excellent and would not be without it. I suffered from congestion of the liver about six years ago and I always say that this medicine cured me. I have also given it to my family for colds and it cured them in a very short time."—Mrs. Enoch Mitchell, Box 125.

Note and Comment

The annual meeting of the Board of Trade will be held on Monday evening, May 1st, when the election of officers will take place and many important questions and items of business will come up for discussion.

The Board has done a great amount of community work in the past year and was the moving factor in getting the U. F. A. Convention here, also the Farmers' Chautauqua. The Board of Trade has backed all the movements that tend for the advancement of community interests, such as, good roads, rural phones, local creamery, municipal hospital, etc.

The membership fee is \$1.00 and the regular meetings are held on the first Monday in each month. A number of the farmers in the district have already signified their intention of joining the Board of Trade and a hearty invitation is extended to everyone to become a member and to boost this district and keep alive the community spirit.

Now is the season of the year when we should all get busy and do a little cleaning of the accumulation of refuse that has been gathering for several months in the back yards.

Burn up all up can and have the balance hauled away before the end of the month.

Geneva Mitchell, a movie star, married the heir of a wealthy family "for a lark."

Geneva's a duck, but when she found she'd married a goose she flew the coop, and hubby had a bird of a time trying to find her. Then his family wouldn't even stake him to a nest egg, and he soon made the strange discovery that a chicken can't live on chicken feed. And now they're parted and scratching for themselves.

The man who was using his Ford as a still didn't get the idea from riding in it.

"We would welcome your bank account," remarks a passing ad. We would, too; let's look for it.

Sign in a London shop:
To celebrate the engagement of our princess. Sausage roll and glass of bitter, 4d.
God bless them both.
Which couple did he mean?

Not long ago the following advertisement appeared in one of the city dailies:

"The man who found a pocketbook containing money in Main St. is requested to forward it to the address of the loser, as he was recognized."

The next day there appeared in the same paper the courteous response:

"The recognized person who picked up a pocket-book in Main St. requests the loser to call at his house at a convenient date."

Railway News
in Brief

Montreal.—Montreal harbor is one of the finest in the world, and it has a fine old custom of honoring the captain of the first trans-Atlantic vessel that arrives there when the shipping season opens. About fifty years ago Captain Howard, then master, originated the idea of presenting a tall silk hat to the first Captain to arrive with a trans-Atlantic ship of any kind, freight or passenger, or both passenger and freight. For about thirty years the custom continued—the first captain to arrive every evening got his tall silk hat. About fifteen years ago silk hats lost some of their popularity as fashions changed. At that time Mr. M. P. Fennell, junior, now General Manager of Montreal Harbor, conceived the plan of presenting the captain of the first trans-Atlantic vessel with a gold-headed cane, and discontinuing the old silk hat. The cane custom continues in vogue. The presentation of the gold-headed cane is an interesting event in Montreal shipping circles. Last year the presentation was made by the president of the Montreal Harbor Commissioners on board the ship of the winning captain in the open air, where the moving picture men could record the incident.

St. John, N.B.—A scheme that is intended to prevent mistakes and facilitate the forwarding of unaccompanied women and girls from their Canadian port of embarkation to their Canadian destinations has been arranged by the department of immigration and colonization, and will henceforth be adopted for all such passengers arriving on Canadian Pacific ships at Montreal, Quebec or St. John. In order to prevent confusion when all passengers are hastening to leave the ship, and to prevent inconvenience to women and girls, it has been arranged that the matron aboard the ship shall supply each unaccompanied woman with a small ribbon for use as a special means of identification. This ribbon will be worn at the time of landing. A red ribbon will identify those proceeding west of Ontario and a blue one those destined for that province. Passengers proceeding to any other points will wear white ribbons. When there are special government replies a yellow ribbon in addition to the red one will designate a party for Saskatchewan; sky blue in addition to red for Manitoba, and brown in addition to red for Alberta. In addition to a staff of stewardesses on all Canadian Pacific ships there is also a matron whose special duty is to attend to the welfare of women and children travelling alone.

"I'm convinced if I had taken Tanlac two years ago, when my troubles first began, I would have been saved a world of suffering," said Ed. W. Field, 538 Jefferson St., Milwaukee, Wis.

"My case proved that when a man's stomach goes wrong, everything goes wrong with him. The first thing I noticed out of the way was loss of appetite and next, that no matter how sparingly I ate, I was sure to have an attack of indigestion. I finally got so I couldn't walk a couple of blocks without having to stop and rest and I was so nervous that often I sat up in a chair all night long."

"Tanalac has made a new man out of me, my stomach is as sound as a dollar and I feel fine all the time. I am a firm believer in Tanlac because I know it delivers the goods."

Tanalac is sold by all good druggists.

Too Much Unrest

Many Causes Advanced for Present Restlessness in World

Opinions as to the cause of "unrest" so much in evidence vary quite as much as the numerous forms in which the unrest manifests itself. Some of the causes advanced are too much jazz, too much booz, too much lawlessness, too much law, too much restraint on the people, too little restraint, too little religion, too much preaching, too much unemployment, too much laziness, and so on. It seems to be either too much or too little of one thing or another. The only thing on which nearly everybody seems to agree is that there is too much unrest.—Springfield (Unl).

The Ganges, India's most important river, is 1,567 miles long, and is navigable for a distance of 350 miles from the sea.

Eager to Get Facts

American Agriculturists Want to Know More About Farming Conditions in Canada

(Special Correspondence by G. C. Porter, of Winnipeg)

Fargo, N.D.—In point of territory covered this is the most important immigration outpost maintained by the Dominion Government in the United States. Through this gateway streams emigrants from Kansas, Missouri, Arkansas, Oklahoma, Texas, Mississippi and Louisiana into the Canadian Northwest. F. H. Hewitt is the agent in charge for the Government here and at present his mail brings thirty-five letters daily enquiring about the prospects for farm, fruit and dairying prospects on the prairies and in British Columbia.

During the past three weeks I have traversed the prairie States of Minnesota, North and South Dakota, Iowa, Nebraska, Kansas and Missouri. Not since 1912 have I found such keen interest in things Canadian.

I attended a Farmers' Institute at Colby, Kan., recently. This is the extreme western part of the State. These "institutes" are informal gatherings of farmers where reports are read from Agricultural Societies, through Agent Hewitt carrying his exhibits to many country fairs in Kansas, the farmers have a very accurate knowledge of the conditions on the Canadian prairies. These people are eager to get facts. They are familiar with scientific soil culture. To tell one of these men that a given farm produced so many bushels to this acre is to invite such a multiplicity of questions that only a soil expert could answer. Jacob Mohler, Secretary of Agriculture for Kansas, says that for the first part of April his office has a considerable number of prospects for the Canadian Northwest who will go up to "spy out the land." Most of these agents would rather have a "prospect" make a trip over the line before he tries to decide on location or details of any kind. Mr. Mohler, in talking to me, remarked, "I have known of many men who went to Canada and prospered and then I have heard of some who came back dissatisfied." It is to avoid these dissatisfied ones that agents are now working.

A Foe to Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the inflamed breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Whistling Tree
The "Tsoar," or whistling tree of South Nubia, is so called from the flute-like sounds made by the wind in its branches. The sound is caused by the holes bored by an insect in the spines of the branches.

Historic Knife

The Camavalet Museum recently received what is said to be the knife of the guillotine used in Paris during the French Revolution and the subsequent Reign of Terror which served to decapitate Louis XVI., Marie Antoinette, Robespierre, and thousands of others. It was a gift to the museum from a Belgian collector. The relic is said to have been in the possession of the family of Sanson the famous executioner of the French Revolution, for several generations.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dupas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from "The Dr. Williams' Medicine Co., Brockville, Ont."

The drug contained in the mesal caecus button produces in the user visions of gorgeous sunsets.

Turkey has a government agricultural bank with a capital of nearly \$15,000,000.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Rosin Has Become Valuable

New Uses Found for a Practically Worthless Product

Many articles in daily use came originally from the ground but few realize that "mining" the rosin has been a thriving industry in the United States for many years, despite the fact that rosin is the product of the sap of certain species of evergreen tree.

Half a century ago rosin was so cheap that it did not pay to put it in barrels and send it to market. The barrels were worth more than the rosin. Turpentine, however, brought a good price and came from the same sap which yielded rosin as a by-product. In consequence manufacturers concentrated on the turpentine and allowed the molten rosin to run into pits, where it hardened and was covered with earth to get it out of the way.

This went on for some twenty-five years, and meanwhile the value of rosin went up because new uses were found for it, principally in the soap and paper industries. For a time people forgot about the tons of valuable rosin lying buried on the site of the old turpentine distilleries, but by and by a group of enterprising manufacturers began to work these rosin "mines." Of course these buried supplies will eventually be used up, and then people will have to turn once more to reducing rosin from pine gum.

Minard's Liniment for Burns, etc.

W. N. U. 1416

Speed of the Tortoise

Takes Nearly Four Years to Travel One Mile

A professor at Wisconsin University in America has been playing a jolly game with tortoises. He has discovered, by letting loose 166 tortoises all labelled, that a tortoise takes four years all but a few days to cover a distance of one mile.

The professor also noticed that in a period of five months the 166 tortoises went a distance of 115 yards, thus making their average speed about two feet in one day.

Travelling at that rate, a tortoise starting from London would take nearly a century to reach Edinburgh.

A STUDY OF OLD AGE

In ways interesting and revealing the fact that the blood is usually thin and lacking in the strengthening properties of young folks blood. If you want to fill your blood with the fire of youth, build up your strength, restore your nerves, just use Dr. Hamilton's Pills. This wonderful medicine is a grand system regulator. Keeps the bowels in good condition, keeps the body free of waste and impurities. For young and old the use of Dr. Hamilton's Pills is recommended, 25c at all dealers or The Catarthorone Co., Montreal.

Blocked Doorway at Hampton Court Opened

Haunted Chamber Has Been Closed For 187 Years

After having been closed for 187 years, a blocked-up doorway at Hampton Court Palace has been reopened.

It connects Henry VIII's so-called Watching Chamber and the well-known Haunted Gallery. Through it have passed Shakespeare, Charles I., Queen Elizabeth, Mary Queen of Scots, Oliver Cromwell, and a host of other historical personages. Catherine Howard, one of Henry VIII's consorts, passed through it on her way to the scaffold.

Shakespeare's company performed plays in the Great Hall of Hampton Court Palace at Christmas, 1603, and the rehearsals took place in the Watching Chamber.

A feature of the "Haunted Gallery" was a picture of the "Wild Man and Woman," brought by Martin Frobisher from America which is supposed to have given Shakespeare his first conception of Caliban.

The doorway was closed by King George II. In 1735, who had the gallery turned into a habitable room.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

A shower bath motor truck accompanies circuses and other travelling organizations.

Minard's Liniment Relieves Neuralgia

Badges, symbolical of their name, are being supplied to many ships of the British navy.

ACHES AND PAINS—SLOAN'S GETS 'EM!

AVOID the misery of racking pain. Have a bottle of Sloan's Liniment handy and apply when you first feel the ache or pain.

It quickly eases the pain and sends a feeling of warmth through the aching part. Sloan's Liniment penetrates without rubbing.

Fine, too, for rheumatism, neuralgia, eczema, sprains and stings, stiff joints, lame back and sore muscles.

For forty years pain's enemy. Ask your neighbor.

At all druggists—35c, 70c, \$1.40. Made in Canada.

Sloan's Liniment (Pain's enemy)

Just Needed Studying

Clock Was All Right If You Understood It

The cleaning of the big clock on the English House of Parliament reminds a story teller of his grandfather's clock, which he treasured very highly in his Gloucestershire family. The ancient in whose house it stands tells visitors that nobody in the household understands much about it except himself, though the clock, he insists, is a good time-keeper. "It only wants studying a bit," he says. "You see, when the hands stand at 12 it strikes 2, and then I know it is twenty minutes to 7."

Railway News in Brief

Toronto.—The employees of the C. P. R. London Division in Toronto terminals gathered at the head of five, Simcoe street, in order to show their respect for former Chief Superintendent F. M. Rutter, Richard Malloy, who occupied the chair, referred to the importance of the occasion and called on A. Mayne, division master mechanic, and Chief Dispatcher James Wansbury who, in their modest manner, and in the language of railroad men, presented Mr. Rutter—who has been transferred to London—with a handsome gold watch and chain and purse of gold.

Vancouver.—Alterations to the Hotel Vancouver, about which rumors have been rife for several months, will certainly not be undertaken this year, declared Mr. Andrew Allerton, manager-in-chief of Canadian Pacific hotels. "The present hotel is quite ample to care for the business which is offering," said Mr. Allerton. "Even if alterations were required at present the executive does not consider this a suitable time to undertake building operations." Although there will be many special train loads of tourists handled by the Canadian Pacific during the coming summer, the hotels will not be called upon to handle any heavier traffic than last year, in his opinion. Tight money will tend to keep tourist travel down, he thinks.

Montreal.—The C. P. R. Windsor Station, Montreal, and the Grand Central Station in New York are now forty minutes closer to each other, as the Delaware and Hudson Railway have decided to accelerate the night train from Montreal so that the departure time will be 9 a.m., instead of 8.20 p.m., although the arrival time in New York will be the same, namely 7.30 a.m. The train will also be elevated to the dignity of a name instead of being as it has hitherto been merely a number, and will henceforth be known as the New York Limited. According to Mr. James Fitz Simonds, of the Delaware & Hudson Railway, prospects of travel from the United States to Canada during the coming season are excellent, and the steadily increasing volume of passenger business has induced the management of his railway to go to the additional expense of accelerating the service between Montreal and New York.

NATION BUILDING IN CANADA

Universities to Follow the Railroad in Binding East and West Together
 For the Cause of National Unity

Hand in hand with the material growth of Canada, with the extension of her population, and the development of her natural resources, moves forward the current of her intellectual and spiritual life. The race of men and women whose adventurous spirit and indomitable courage are making a nation, are not the kind that are content with the merely material things of life. Canada's pioneers of a little while ago were young men who saw visions, and old men who dreamed dreams, and their sons and daughters are no less gifted. Their broadening horizon now includes a new world of mental and spiritual effort in which they,

in turn, must be pioneers. The realization of this fact has become a living force in the fine universities that are already doing a great work at Winnipeg, Edmonton, and Saskatoon and Vancouver.

In the making of the Canadian nation so far, avenues of transport and communication have worked towards completion of the structure the foundation stone of which was the Act of Dominion Federation. Canada's national unity is founded and fostered by the political and physical links that bind east and west, but it can be fully developed only when the avenues

of Canadian thought move east and west as do those of trade. This is the thought that lies behind the recent donation by the C. P. R. of three annual scholarships of the value of \$500 each to Toronto University for the purpose of inducing graduates of Western Colleges to complete their studies at that great Canadian centre of learning.

The universities of Western Canada are growing fast. Their standard of instruction is high, and an ever growing number of their students desire to pursue post-graduate studies beyond the stage now possible at their

provincial institutions. Through these scholarships a constant stream of the brightest and most ambitious of western university students will be enabled to spend some time in Eastern Canada and thus become familiar with methods of life and thought there. As stated by Mr. E. W. Beatty, President of the Canadian Pacific Railway, in his letter to Sir Robert Falconer, President of Toronto University, announcing the granting of the three scholarships. "The movement is one that will obviously be of benefit, not only to the students, but also to the communities in which they will afterwards live."
